

I-10 Lane Closures in Seguin starts Feb. 5

San Antonio District

I-10 Construction Project Lane Closures

CLOSURE

Beginning Monday, February 5, at 9:00 p.m., there will be alternate lane closures on I-10 east and westbound, between FM 464 and Huber Road, while the contractor installs barrier on the inside shoulder. This is a temporary lane closure and all lanes will reopen by 5:00 a.m., daily. Work is expected to be completed on Friday, February 9.

Early warning signs and message boards will notify the traveling public of the closures. Motorists travel in or around the work zone should reduce their speed, remain vigilant and watch for large equipment and crewmen.

PURPOSE

Crews are working to widen I-10 from 4 lanes to 6 lanes, between FM 464 and SH 130, to include resurfacing between SH 123 and SH 130. The estimated completion date is Fall 2029.
